Key Points

Today

- Heat index values of 105+ degrees across the eastern half of the Region

Sunday through Wednesday

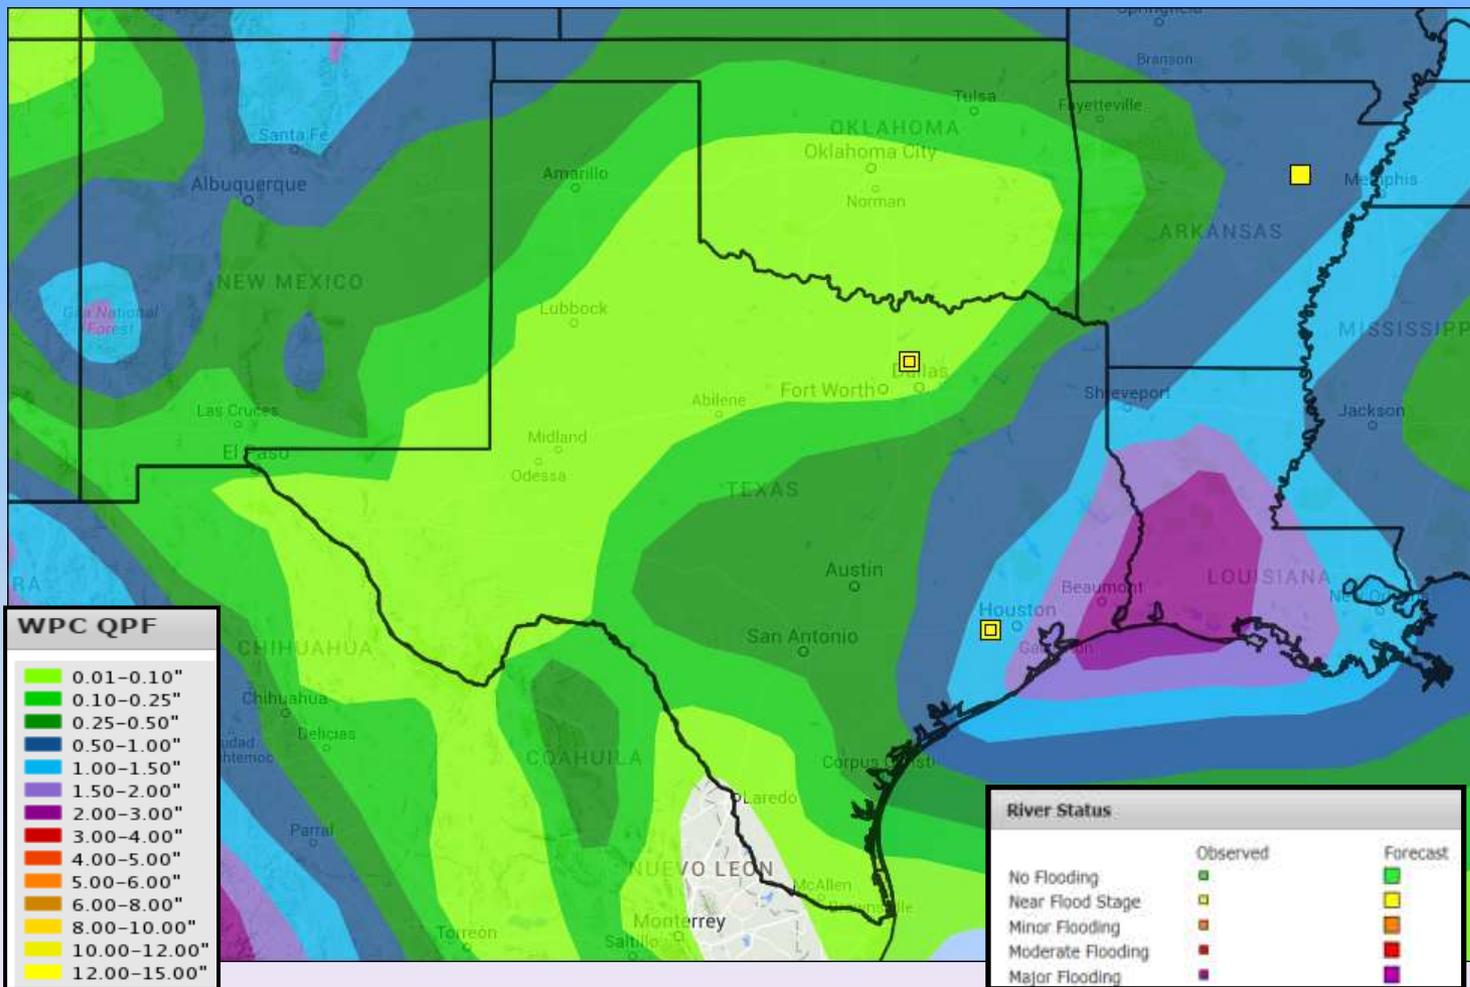

- Showers and storms possible each day across portions of NM and eastern third of the Region, but widespread severe weather and/or flooding is not expected
- Heat index values of 105+ degrees across the eastern half of the Region through Monday

Tropical Outlook

- No new tropical development expected in the next five days

River Flood Status/5 Day Forecast Rainfall

Rainfall over SE TX and LA will be from accumulated daily rain chances, not all within a short period. Therefore, no significant river flooding is expected.

Disclaimer:
Although this image shows the next 5 days of expected rainfall, river forecasts only incorporate 1-2 days worth of precipitation.

See <http://www.srh.noaa.gov/rfcexp/main.php?fs=1> for the latest on river flooding
