Key Points

Thursday

- Scattered strong to severe storms over W OK and parts of the TX panhandle may produce damaging winds today.

Friday

- A few storms over S OK, extreme northern TX, and northern AR may produce damaging winds on Friday.

Saturday through Monday

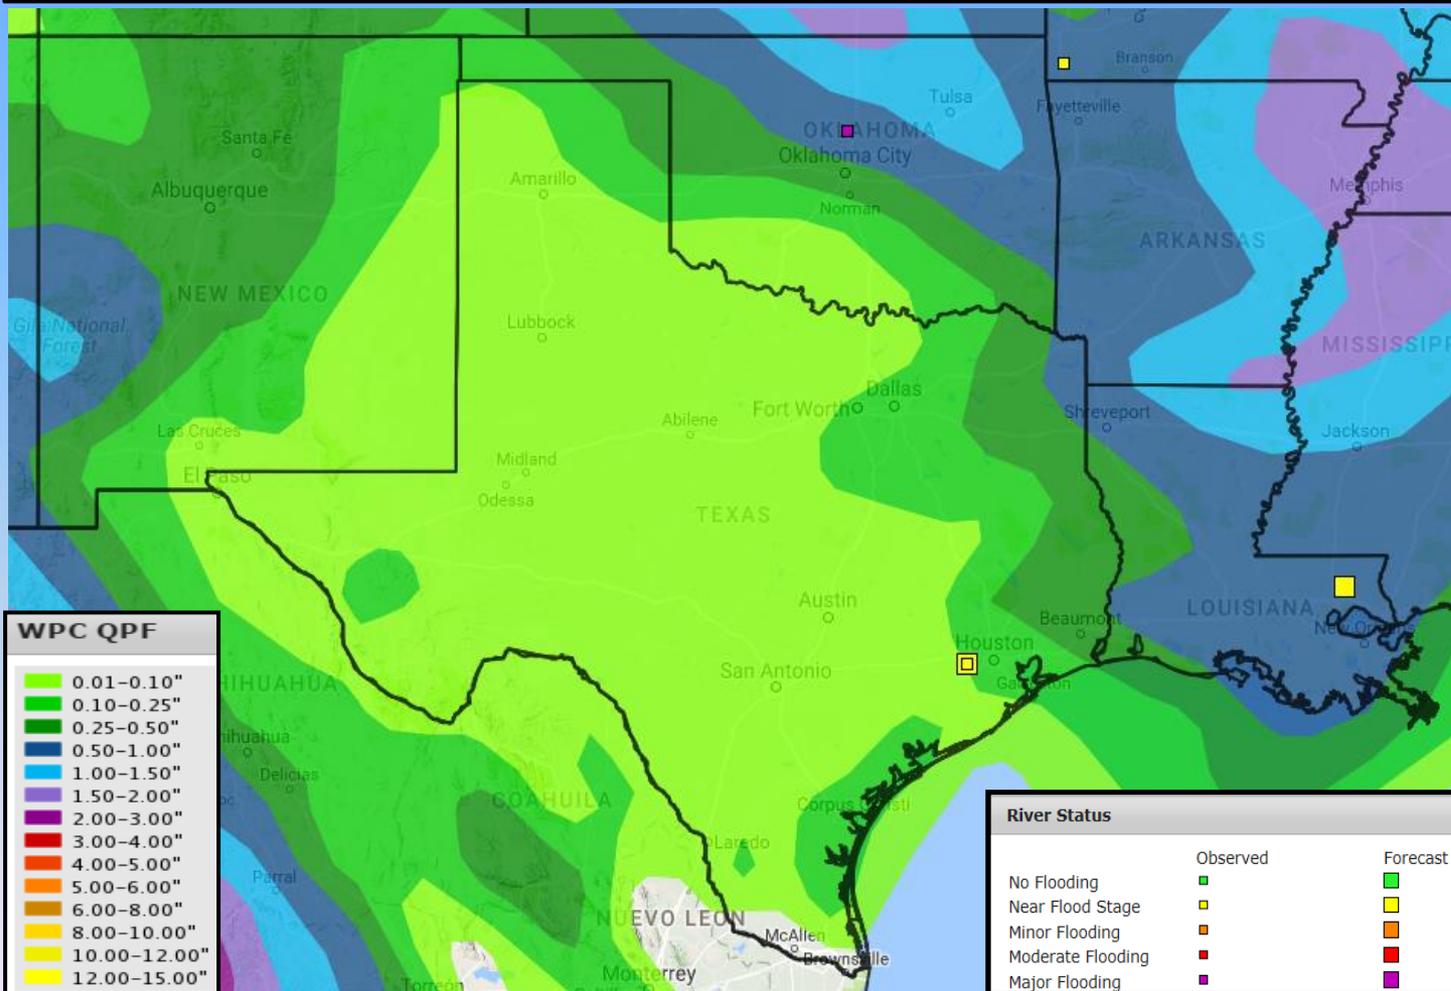

- Scattered showers and thunderstorms will continue through the weekend, but widespread severe weather and/or flooding is not expected.

Tropical Outlook

- A tropical wave along the coast of western Africa has a medium chance of development in the next several days as it heads west.

River Flood Status/5 Day Forecast Rainfall

Rainfall over northern and eastern portions of the Region will be from accumulated daily rain chances, not all within a short period. Therefore, no significant river flooding is expected.

Disclaimer:
Although this image shows the next 5 days of expected rainfall, river forecasts only incorporate 1-2 days worth of precipitation.

See <http://www.srh.noaa.gov/rfcexp/main.php?fs=1> for the latest on river flooding
