FEMA Region 6 Weather Threat Briefing

Sunday, November 20, 2016

Issued: 0800 CT

Day 1 Weather Hazards: No significant weather threats

National Weather Service

**Southern Region Headquarters
Regional Operations Center
Fort Worth, TX**

**Prepared by: Mark Wiley
817-978-1100 x 147**

Key Points

Sunday - Monday

- Quiet weather for most of the Region w/ no significant impacts

Tuesday-Thursday

- Cold front moves across the eastern half of the Region Tuesday into Wednesday bringing the chance for showers and thunderstorms
 - Marginal threat for severe thunderstorms over E OK and E TX on Tuesday

Tropical Outlook

- Tropical Depression could form over the southwestern Caribbean Sea early next week
- No impacts to FEMA 6 as it will stay well to the south of the Region

Tropical Weather Outlook

No Impacts to FEMA 6

- A Tropical Depression could form over the southwestern Caribbean Sea early next week but the system will stay well to the south of FEMA 6

Disorganized cloudiness and showers over the southwestern Caribbean Sea are associated with a broad low pressure area. Upper-level winds have become less conducive, and during the next couple of days any development should be slow to occur. After that time, environmental conditions are expected to be more conducive for gradual development, and a tropical depression could form early next week while the low moves slowly and erratically.

- Formation chance through 48 hours...low...50%**
- Formation chance through 5 days...medium...70%**

5-Day Precipitation Forecast & River Flood Status

There is currently no significant river flooding observed/forecast across the Region.
