Note 1: Summary of Significant Accounting Policies

Entity

The Texas Department of Public Safety is an agency of the State of Texas and its financial records comply with state statutes and regulations. This includes compliance with the Texas Comptroller of Public Accounts' Reporting Requirements for State Agencies.

The Department of Public Safety was created under the provisions of S.B. 146, 44th Legislature, Regular Session (1935), which incorporated the Texas Rangers and the State Highway Patrol into a new department. The principal objectives of the Department are to protect the life, rights, privileges and well-being of the people of Texas.

Due to the statewide requirements embedded in Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments*, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in this statement. The financial report will be considered for audit by the State Auditor as part of the audit of the State of Texas Comprehensive Annual Financial Report; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

Blended Component Units: No component units have been identified which should have been blended into an appropriate fund.

Fiduciary Fund Types

Fiduciary funds account for assets held by the state in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and/or other funds. When assets are held under the terms of a formal trust agreement, either a pension trust fund, or a private purpose trust fund is used.

Agency Funds: Agency funds are used to account for assets the government holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

Basis of Accounting

The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental fund types that build the fund financial statements are accounted for using the modified accrual basis of accounting. Under the modified accrual basis, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year-end. The State of Texas considers receivables collected within **sixty days** after year-end to be available and recognizes them as revenues of the current year for Fund Financial Statements prepared on the modified accrual basis. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

Governmental adjustment fund types that will build the government-wide financial statements are accounted for using the full accrual basis of accounting. This includes capital assets, accumulated depreciation, unpaid Employee Compensable leave, the unmatured debt service (principal and interest) on general long-term liabilities, long-term capital leases, long-term claims and judgments and full accrual revenues and expenses. The activity will be recognized in these fund types.

Budgets and Budgetary Accounting

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act).

Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

Assets, Liabilities, and Fund Balances/Net Assets

Assets

Cash and Cash Equivalents: Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Inventories and Prepaid Items: Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost generally utilizing the last-in, first-out method. The consumption method of accounting is used to account for inventories and prepaid items that appear in the governmental and proprietary fund types. The cost of these items is expensed when the items are consumed.

Capital Assets: Assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year should be capitalized. These assets are capitalized at cost or, if not purchased, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. "Inexhaustible" assets such as works of art and historical treasures are not depreciated. Road and highway infrastructure is reported on the modified basis. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

Current Receivables - Other: Other receivables include year-end revenue accruals. This account can appear in governmental and proprietary fund types.

Liabilities

Accounts Payable: Accounts Payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Current Payables - Other: Payables are the accrual at year-end of expenditure transactions. Payables may be included in either the governmental or proprietary fund types.

Employees' Compensable Leave Balances: Employees' Compensable Leave Balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or non-current in the statement of net assets.

Fund Balance / Net Assets

The difference between fund assets and liabilities is 'Net Assets' on the government-wide, proprietary and fiduciary fund statements, and the 'Fund Balance' is the difference between fund assets and liabilities on the governmental fund statements.

Fund Balance Components: Fund balances for governmental funds are classified as non-spendable, restricted, committed, assigned or unassigned in the fund financial statements.

- Non-spendable fund balance includes amounts not available to be spent because they are either (1) not in spendable form or (2) legally or contractually required to be maintained intact.

- Restricted fund balance includes those resources that have constraints placed on their use through external parties or by law through constitutional provisions.
- Committed fund balance can be used only for specific purposes pursuant to constraints imposed by a formal action of the Texas Legislature, the state's highest level of decision making authority.
- Assigned fund balance includes amounts constrained by the state's intent to be used for specific purposes, but are neither restricted nor committed. Intent is expressed by (1) the Texas Legislature or (2) a body (for example, a budget or finance committee) or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes.
- Unassigned fund balance is the residual classification for the general fund. This classification represents fund balance that was not assigned to other funds and was not restricted, committed or assigned to specific purposes within the general fund.

Invested In Capital Assets, Net Of Related Debt: Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bond, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.

Restricted Net Assets: Restricted net assets result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors and the like or imposed by law through constitutional provisions or enabling legislation.

Unrestricted Net Assets: Unrestricted net assets consist of net assets that do not meet the definition of the two preceding categories. Unrestricted net assets often have constraints on resources, which are imposed by management but can be removed or modified

Interfund Activities and Balances

The agency has the following types of transactions between funds:

Transfers: Legally required transfers that are reported when incurred as 'Transfers In' by the recipient fund and as 'Transfers Out' by the disbursing fund.

Reimbursements: Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one fund for another that are recorded as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund. Reimbursements are not displayed in financial statements.

Interfund Receivables and Payables: Interfund loans are reported as interfund receivables and payables. If repayment is due during the current year or soon thereafter it is classified as "Current", repayment for two (or more) years is classified as "Non-Current".

Interfund Sales and Purchases: Charges or collections for services rendered by one fund to another that are recorded as revenues of the recipient fund and expenditures or expenses of the disbursing fund.

Employees' Compensable Leave

A state employee is entitled to be paid for all unused vacation time accrued, in the event of the employee's resignation, dismissal, or separation from State employment, provided the employee has had continuous employment with the State for six months. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental fund types. For these fund types, the liability for unpaid benefits is recorded in the Statement of Net Assets. An expense and liability for proprietary fund types are recorded in the proprietary funds as the benefits accrue to employees. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits.

Pollution Remediation Obligations

The Agency is responsible for: the maintenance of DPS state owned underground storage tanks and is currently managing 8 sites; conducting mold and lead remediation at the North Lamar and Florence shooting ranges; the cleanup and preventative measures for the protection of Waller Creek; asbestos abatement in DPS state owned offices; and also managing chemical spill sites.

The following is a summary of the original capital costs of all such property under the lease in addition to the accumulated depreciation as of 8/31/16:

Governmental Activities

Note 14: Adjustments to Fund Balances/Net Assets

During FY 2016, adjustments were made which required the restatement of the amounts in fund balances and fund equity as shown and discussed below:

- a. Capital Assets related error corrections
- b. Error correction

	Capital Assets	Fund 0001	Fund 0092	Fund 0221	Fund 0222	Fund 0006

b. Error correction		(8,665.91)	(150,697.59)	(9,895.60)	0.00	(2,374,351.15)
Fund Balance September 1, 2015 as Restated	\$450,321,625.82	\$90,728,420.80	\$3,012,134.31	\$429,811.21	\$231,599.85	\$2,002,734.26

Note 15: Contingent Liabilities**Unpaid Claims and Lawsuits**

Unpaid claims totaled \$18,496.87 as of August 31, 2016. These miscellaneous claims were set up as liabilities. (Please see note 5.)

As of August 31, 2016, the Texas Department of Public Safety or employees of the Texas Department of Public Safety sued on behalf of their official acts were named as defendants in 109 lawsuits. These included suits arising from tort claims, civil rights, wrongful death and third party claims. The monetary range of potential damages claimed against the Department range from \$0 (i.e. injunctive relief only sought) to \$35,000,000. Some cases are clearly frivolous in nature. Adverse judgment of suits determined valid could result in liabilities to the Department, but based on prior experience, it is unlikely that the outcome for these claims will materially affect the financial position of the Department. It is anticipated that any resulting judgments of consequence would be presented to a forthcoming session of the legislature for its consideration as to method of funding.

Federal Assistance

The Department has received several federal grants for specific purposes that are subject to review and audit by the grantor agencies. Such audits could lead to a request for reimbursements from grantor agencies for expenditures disallowed under the terms of the grant. Based on prior experience, management believes such disallowances, if any, will be immaterial.

Note 16: Subsequent Events

Not Applicable

Note 17: Risk Management

DPS is exposed to a variety of civil claims resulting from the performance of its duties. It is agency policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed.

The agency assumes substantially all risks associated with tort and liability claims due to the performance of its duties. Currently there is no purchase of commercial insurance nor is the agency involved in any risk pools with other government entities.

The agency's liabilities are reported when it is both probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Liabilities are reevaluated periodically to consider current settlements, frequency of claims, past experience and economic factors. There were no significant reductions in insurance coverage in the past year and losses did not exceed funding arrangements during the past three years. Changes in the balances of the agency's claims liabilities during fiscal 2016 were:

	Beginning Balance	Increases	Decreases	Ending Balance
2016	\$147,797.76	\$1,015,165.85	(\$1,144,466.74)	\$18,496.87

Note 18: Management Discussion & Analysis

DPS had three notable items in FY 2016:

- 1) In fiscal year 2016 a major change in funding occurred. DPS is primarily being funded out of Fund 0001. Large variances will be noted between increase activity in Fund 0001 and large decreases in Fund 0006.
- 2) DPS was appropriated additional funding to secure the border including additional equipment and personnel.
- 3) Five disasters were declared in fiscal year 2016 by the Federal Emergency Management Agency (FEMA), four severe storm and flooding declarations and the Hidden Pines fire.

Note 19: The Financial Reporting Entity

The Texas Department of Public Safety Foundation, a non-profit 501C (3) organization, was established in 2012 to support DPS in fulfilling its mission to serve the people of Texas. The Foundation was set up to:

- 1) Strengthen the agency by providing financial assistance to DPS to fulfill its mission
- 2) Recognize employee valor and sacrifice, and
- 3) Contribute to employee injured in the line of duty and families of employees killed in the line of duty.

Note 20: Stewardship, Compliance, & Accountability

Confiscated/Entrusted Property

Confiscated/Entrusted Property represents assets held by the Department as the result of criminal investigations or stolen assets recovered by the Department. Those seized assets are held in the custody of the Department at the request of various courts in the State until court decisions have been made. At the time of the decisions, the property will either be returned to the defendant or awarded to the State, county, or federal government. Stolen assets recovered by the Department are held until positive identification is made and those items can be returned to the rightful owner.

Confiscated/Entrusted Property may consist of cash, foreign currency, automobiles, airplanes, weapons, precious metals and various other assets of value and is maintained throughout the State in Department-secured locations. On August 31, 2016, a physical count of the property was performed. U.S. monetary assets are recorded in Agency Funds. The values of the other confiscated assets cannot be readily determined and are disclosed only by type as listed above.
