Item # 1

Class-Item 803-16

Term Contract 615-A1 Belkin WeMo Home Automation Switch & Motion Sensor Item

Description: Turns household devices on or off as motion is detected Kit lets you turn electrical devices on or off in your home. The kit includes a WeMo power switch and WeMo motion sensor. Use it, for example, to program a light to turn on when you walk into the house or a fan to turn off when you leave. For use with home appliances and electronics that have a standard AC plug. Convenient wireless connectivity offers flexibility and easy set-up. Uses your existing wireless (Wi-Fi) network and Apple device with iOS 5 or higher (iPhone, iPad or iPod touch). The motion sensor activates the switch remotely using Wi-Fi. A free WeMo app lets you control the system and is available via download. Motion sensor detects movement from up to 10ft away, activating the switch. Its 6ft power cord lets you optimize sensor placement. Modular design for easy expansion. You can add more WeMo switches (sold separately) to control additional devices. Also, more than one switch can be linked to a given sensor, to turn on multiple devices with a single sensor. Easily installs in just minutes. Plug the sensor unit into a standard AC outlet and position it. Then plug the WeMo switch into a separate AC outlet, and plug into it the device you want to control. Download the free WeMo app to your Apple device. Next, connect the sensor and switch to your wireless network.
