

# INDEX CRIME ANALYSIS

3

## MURDER

### DEFINITION

Murder and nonnegligent manslaughter, as defined in the UCR program, is the willful killing of one human being by another.

This offense category includes any death resulting from a fight, argument, quarrel, assault or commission of a crime. Attempted murder and assaults with the intent to kill are not counted as murder, but are included in UCR as aggravated assaults. Suicides, accidental deaths, and justifiable homicides are also excluded from the murder classification.

The classification of this offense, as well as for all Index Crimes, is based solely on police investigation and not upon determinations by courts, medical examiners, coroners, juries, or other judicial bodies.

### ANALYSIS

#### Volume

The reported number of murders committed in Texas in 2011 was 1,089. This represented a 12.7 percent decrease in the number of murders when compared to 2010. More persons were murdered in Texas in May, while the fewest were killed during January. Property loss during the commission of the crime of murder amounted to \$453,237.

#### Rate

The murder rate for Texas in 2011 was 4.2 murders for every 100,000 persons, a decrease of 14.3 percent from 2010.

#### Clearance Rate

Texas law enforcement agencies continue to be successful in solving a greater percentage of murders than any other Index Crime. In 2011, 75

percent of all murders were cleared by arrest or exceptional means.

**Murder by Month Totals - 2011**

**Murder Offenses 2001-2011**

#### Nature

Of the 1,089 murders in 2011, 69 percent were committed by the use of firearms. Knives or cutting instruments were the weapons of choice in 16 percent of the reported cases. The use of strong-arm weapons (hands, feet and fists) accounted for 7 percent of the murders. Blunt objects were utilized

in 4 percent of the murders and in the remaining 4 percent, the murder weapon of choice was listed as unknown or other, which includes poison, fire, drugs, drowning, strangulation and asphyxiation.

Of the murders in which firearms were the instrument, handguns accounted for 71 percent of the weapons (or 49 percent of all murders). Shotguns were employed in 7 percent of the firearm murders, rifles were used in 5 percent and firearms whose type was not stated accounted for the remaining 17 percent.

### Persons Arrested

When compared to 2010 statistics, the number of persons arrested for the crime of murder in Texas decreased 14 percent. Of the persons arrested for murder, 89 percent were male; 5 percent were age 16 and under, 65 percent were White and 34 per-

cent were Black; and .7 percent were Asian/Pacific Islander; 63 percent were not Hispanic; and 37 percent were Hispanic.

### Justifiable Homicide

Statistics on murder circumstances, victims, and victim/offender relationships on the next page include justifiable homicides. Justifiable homicide is the killing of a felon by a peace officer in the line of duty or the killing (during the commission of a felony) of a felon by a private citizen. In 2011, there were 56 justifiable homicides, of which, 33 were felons killed by private citizens, and 23 were felons killed by police.

### Murder Circumstances

Supplementary homicide information on murder circumstances is collected in two broad categories: felony type and non-felony type. While, in Texas, all murders are felonies, felony type circumstances refer to murders which occur in conjunction with the commission of another crime.

Murder Circumstances			
Circumstance Type	Group %	Circumstance	Number
Felony Type	15%	Rape	2
		Robbery	106
		Burglary	5
		Larceny	1
		Arson	13
		Prostitution & Commercialized Vice	0
		Motor Vehicle Theft	1
		Other Sex Offenses	1
		Narcotic Drug Laws	25
		Gambling	0
		Other Felony Type	16
		All Suspected Felony Type	0
Non Felony Type	57%	Lover's Triangle	7
		Child Killed by Baby Sitter	2
		Brawl Due to Influence of Alcohol	8
		Brawl Due to Influence of Narcotics	6
		Argument Over Money or Property	22
		Other Arguments	365
		Juvenile Gang Killings	3
		Gangland Killings	9
		Institutional Killings	0
		Sniper Attack	0
		Other Circumstances	193
Justifiable	5%	Felon Killed by Private Citizen	33
		Felon Killed by Police	23
Unknown	23%	Unknown Circumstances	249

## MURDER VICTIMS

Law enforcement agencies participating in UCR provide additional homicide information so that an in-depth analysis of murder is possible. Through the Supplemental Homicide Reporting system, information is provided that identifies the age, sex, race and ethnic origin of both victims and offenders; the relationship of the victim to the offender; the murder weapon; and the circumstances of the offense.

Based on the information relating to murder victims it can be determined that 76 percent of murder victims, in 2011, were male and 24 percent were female. The age group with the greatest number of murder victims for males is the 20 to 24 age group.

The age group with the greatest number of murder victims for females is the 25 to 29 age group.

Of the victims whose race was known, 57 percent were White, 35 percent were Black and the remaining 8% were Asian/Pacific Islander. For White victims, the most common age group was the 20 to 24 age bracket. For Black victims, the most common age group was the 20-24 age bracket. Of the murder victims whose ethnicity was known, 69 percent were not Hispanic and 31 percent were Hispanic.

Relationship of Victim to Offender			
Relationship Type	Group %	Victim's Relationship	Number
Family	21%	Husband	15
		Wife	53
		Common-Law Husband	6
		Common-Law Wife	7

		Homosexual Relationship	3
Other	48%	Other--Known to Victim	21
		Stranger	235
		Unknown Relationship	286

# RAPE

## DEFINITION

Rape, as defined in the Uniform Crime Reporting program, is the carnal knowledge of a female forcibly and against her will. Statistics reported in this crime category include assaults to commit forcible rape, however, statutory rape (rape against a female under the age of consent) and sexual assaults on males are excluded.

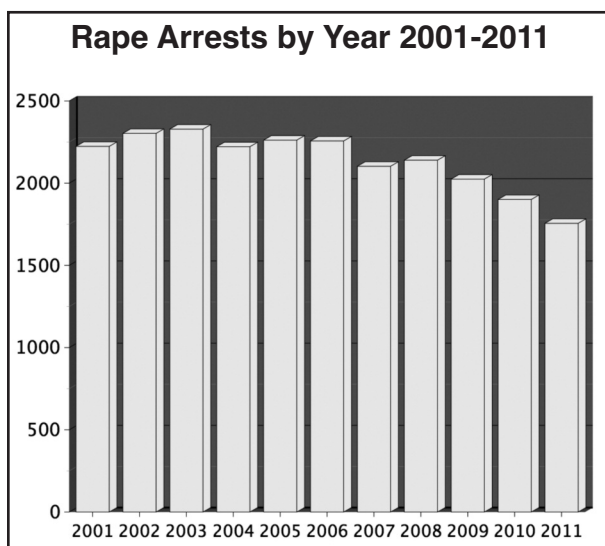

## ANALYSIS

### Volume

The estimated number of rapes committed in Texas in 2011 was 7,445. This represented a decrease of 2.4 percent in the number of rapes when compared with 2010. More rapes were committed in Texas in May than in any other month, while the fewest rapes were committed during December. Property loss during the commission of rape amounted to \$143,806.

### Rate

The rape rate for Texas in 2011 was 29 rapes for every 100,000 persons. This is a decrease of 4.3 percent from 2010.

## Clearance Rate

Statewide, Texas law enforcement agencies continue to be successful in clearing 45 percent of all rapes that were reported. With the attempts to commit forcible rape, 48 percent were cleared.

## Nature

Forcible rape differs from other violent crimes because, in many cases, the victim is hesitant to report the offense to police. The rigors of court procedures, embarrassment and fear of any accompanying stigma exert a deterrent effect upon the victim's willingness to contact the police. The presence of prior relationship between the victim and offender may make the determination of force difficult to establish, while the usual clandestine nature of this crime presents a problem in verification. As attitudes towards the reporting of rape change, trends in the number of reported offenses can be expected to change accordingly.

Of all reported forcible rapes during 2011, 7 percent were attempts to commit forcible rape and 93 percent were rapes by force.

## Persons Arrested

When compared with 2010, the number of persons arrested for forcible rape decreased 8 percent to 1,756. Of the forcible rape arrestees in 2011, 11 percent were juveniles (16 and under) and the remainder were adults; 99 percent were male; 77 percent were White, and 23 percent were Black; 57 percent were not Hispanic and 43 percent were Hispanic. The 15 to 19 age group had the highest number of arrests. Because, by definition, the crime of rape is limited to the carnal knowledge of a female by a male, the overwhelming majority of persons arrested for this crime are male. The small number of females arrested for rape, 23 persons in 2011, are generally arrested as accomplices.

# ROBBERY

## DEFINITION

Robbery, in the Uniform Crime Reporting program, is defined as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force, threat of force or violence, or by putting the victim in fear.

Robbery is a violent crime that frequently results in injury to the victim. Included in this category are assaults to commit robbery and attempted robberies.

## ANALYSIS

### Volume

The estimated number of robberies committed in Texas in 2011 was 28,399. This represented a 13.6 percent decrease in the number of robberies when compared with 2010. More robberies were committed in Texas in May than in any other month, while the fewest robberies were committed during the month of February.

### Rate

The robbery rate for Texas in 2011 was 110.6 robberies for every 100,000 persons. The change in the rate of robbery from 2010 was a decrease of 15.4 percent.

### Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 30 percent of all robberies that were reported. Of the robberies by type of weapon used, both knife or cutting instrument and other dangerous weapon shared the highest rate of clearance at 38 percent each, while robbery by firearm was the classification with the lowest rate of clearance at 24 percent.

### Nature

In 2011, property loss during the commission of robberies amounted to \$50,899,285. The state total was a 9 percent decrease from the property loss experienced in 2010. The value of property stolen during robberies averaged \$1,863 per incident. Average dollar losses ranged from \$718 taken

during robberies of convenience stores to \$5,994 per bank robbery. The impact of this violent crime cannot be measured in terms of monetary loss alone. While the object of robbery is money or property, the crime involves force or threat of force and many victims suffer serious personal injury.

Robberies on streets or highways accounted for 29 percent of the offenses in this category. Robberies of commercial and financial establishments accounted for 14 percent of the total, and robberies occurring at residences, 27 percent. The remainder were convenience stores and gas stations (9 percent) and miscellaneous types (21 percent).

Of all reported robberies in 2011, 46 percent were committed with the use of firearms. Strong-arm tactics accounted for 36 percent, knives or cutting instruments were used in 9 percent and other dangerous weapons made up the remainder.

### Persons Arrested

Statewide arrests for robbery in 2011 amounted to 6,700 persons. When compared with 2010, the number of persons arrested for robbery decreased 10 percent. Of the robbery arrestees in 2011, 16 percent were juveniles with the remainder being adults; 87 percent were male; 55 percent were White; 44 percent were Black; 65 percent were not Hispanic and 35 percent were Hispanic. The age group reflecting the largest number of robbery arrestees was the 15-to-19-year-old bracket.

# AGGRAVATED ASSAULT

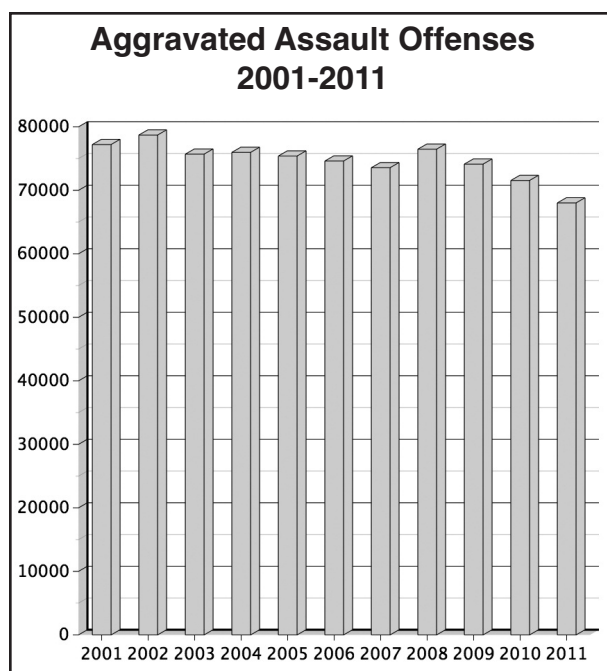

## DEFINITION

Aggravated Assault is defined in the Uniform Crime Reporting program, as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Statistics for aggravated assault include attempts to commit aggravated assault.

## ANALYSIS

### Volume

The estimated number of aggravated assaults committed in Texas, in 2011, was 68,028. This represented a decrease of 4.9 percent when compared to 2010. More aggravated assaults were committed in Texas in April than in any other month, while the fewest aggravated assaults were committed during February.

### Rate

The aggravated assault rate for Texas in 2011 was 265 aggravated assaults for every 100,000 persons. The change in the rate of aggravated assault from 2010 was a decrease of 6.9 percent.

### Nature

Of all reported aggravated assaults in 2011, 22 percent were committed with the use of firearms. Other dangerous weapons accounted for 34 percent of the aggravated assaults. Strong-arm weapons (hands, feet, fist, etc.) accounted for another 21 percent and knives or cutting instruments made up the remaining 23 percent.

The use or attempted use of a dangerous weapon in an assault or the serious injury inflicted by hands, fists or feet is what separates this index offense from assaults categorized as "simple assaults". Texans reported 305,114 simple assaults in 2011.

### Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing 57 percent of all aggravated assaults that were reported. Of the aggravated assaults by type of weapon used, knife or cutting instrument assaults experienced the highest rate of clearance (67 percent), while aggravated assault by firearm showed the lowest rate of clearance (47 percent).

### Persons Arrested

Texas law enforcement agencies arrested 22,103 persons for aggravated assault in 2011. When compared with 2010, the number of aggravated assault arrests decreased 4.3 percent. Of the aggravated assault arrestees in 2011, 5.6 percent were juveniles (16 and under); 78 percent were male; 70 percent were White; 29 percent were Black and the remainder were other races; 37 percent were Hispanic and 63 percent were not Hispanic. The age group with the highest number of aggravated assault arrestees was the 20-to-24-year-old bracket.

# BURGLARY

## DEFINITION

Burglary, for Uniform Crime Reporting purposes, is the unlawful entry of a structure with the intent to commit a felony or a theft. While the use of force to gain entry is not required to classify an offense as burglary, attempted forcible entries to commit burglary are counted in this crime's statistics.

## ANALYSIS

### Volume

The estimated number of burglaries committed in Texas in 2011 was 215,512. This number represents a 6 percent decrease when compared with the number of burglaries in 2010. More burglaries were committed in May than in any other month. The month with the fewest burglaries was February.

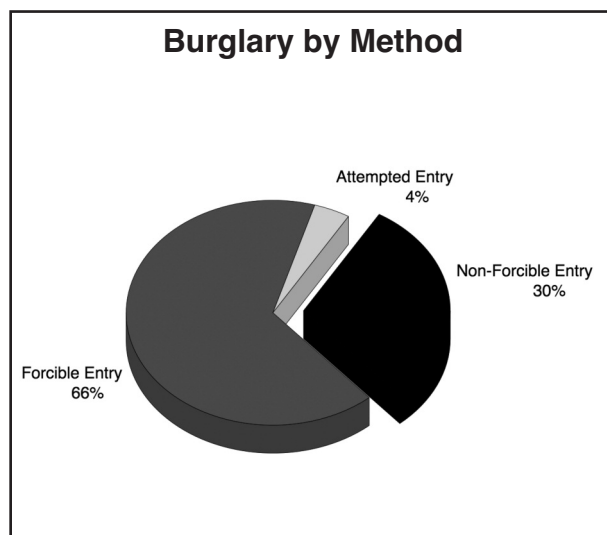

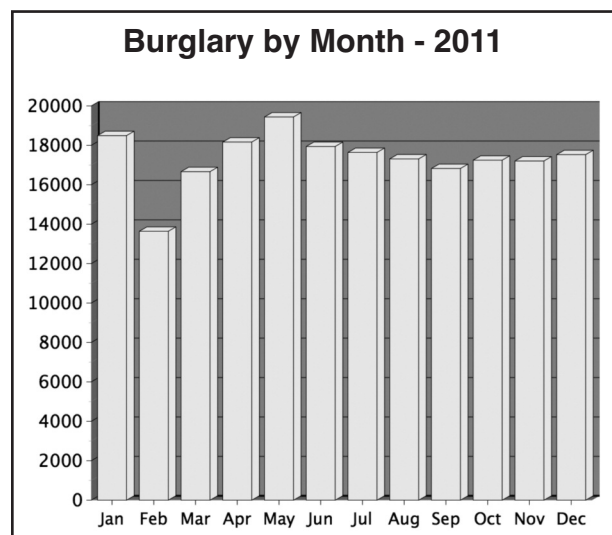

### Rate

The 2011 burglary rate for Texas was 839.4 for every 100,000 persons. The change in the burglary rate from 2010 was a decrease of 7.9 percent.

### Nature

Of all reported burglaries in 2011, 74 percent occurred at residences. Forcible entry accounted for 66 percent of all burglaries, while 31 percent were unlawful entries without force and the remainder were forcible entry attempts. Of the offenses for which the time of occurrence was known, 45 percent were during the day with 27 percent during the night, and the value lost was greater during the day (45 percent) than at night (23 percent).

### Value Lost to Burglary 2001-2011

### Value

In 2011, Texas burglary victims suffered losses totaling \$515,597,894. This total represented an increase of 4 percent when compared to 2010 total burglary losses. The average dollar loss per burglary was \$2,476. The average loss for residential offenses was \$2,438, while for non-residential property, it was \$2,583.

### Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 10 percent of all burglaries reported. Burglaries classified as unlawful entry had the highest rate of clearance (11 percent). Attempted forcible entry and forcible entry both had (9 percent) clearance rate.

### Burglary Arrestees by Age and Sex

### Persons Arrested

In 2011, 18,593 arrests for burglary were made by Texas law enforcement agencies. When compared to 2010, the number of persons arrested for burglary decreased 6.5 percent. Of the burglary arrestees, 16 percent were juveniles (16 and under) with the remainder being adults; 89 percent were male; 71 percent were White; 28 percent were Black; 63 percent were not Hispanic and 37 percent were Hispanic. The age group with the largest number of burglary arrestees was the 15-to-19 year-old group.

### Burglary by Locations

### Burglary by Time of Day

# LARCENY-THEFT

## DEFINITION

Larceny-Theft, in the Uniform Crime Reporting program, is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Larceny-Theft includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, and other things of value in which no use of force, violence or fraud occurs.

This crime classification does not include embezzlement, 'con' games, forgery, and the passing of worthless checks. Motor vehicle theft is not included in this category as it is a separate index crime offense.

## ANALYSIS

### Volume

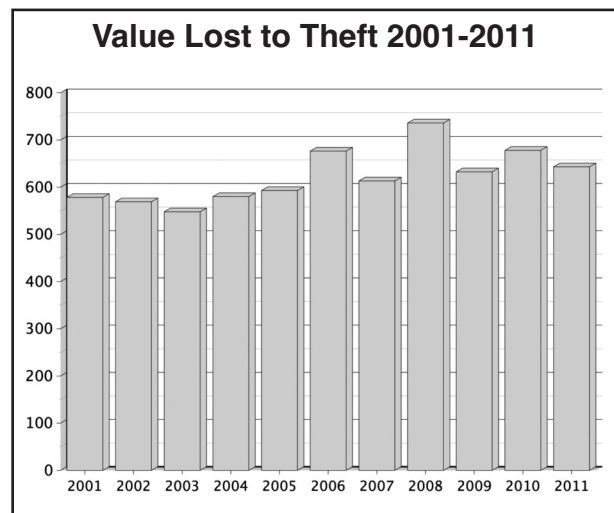

The estimated number of thefts committed in Texas in 2011 was 613,528, making this the largest crime category of the Index Crimes. The volume of theft in 2011 decreased 6.2 percent from 2010. More thefts were committed in Texas in May than in any other month, while the fewest thefts were committed during February. It is reasonable to expect that

many offenses in this category, particularly where the value of goods stolen is small, are never reported to police agencies.

### Rate

The 2011 theft rate for Texas was 2,389.6 thefts for every 100,000 persons. The change in the theft rate from 2010 was a decrease of 8.2 percent.

## Nature

In 2011, theft victims suffered losses totaling \$643,358,174. This total represents a decrease of 5.1 percent when compared with 2010 total theft losses. The average dollar loss per theft was \$1,079, up from \$1,036 in 2010. Thefts in the 'under \$50' category accounted for 28 percent of all reported thefts (but only 1 percent of the value lost), while thefts of values greater than \$200 accounted for 51 percent of the total (and 97 percent of the total value lost). The remainder of the thefts were between \$50 and \$200--these thefts accounted for 21 percent of the volume (and 2 percent of the value lost).

For data collection, larceny-theft is divided into nine categories: pocket-picking, purse-snatching, shoplifting, thefts from motor vehicles, theft of motor vehicle parts, theft of bicycles, theft from buildings, theft from coin-operated machines, and all other thefts (except motor vehicles). Of the nine theft categories, the highest average theft was all other thefts, which yielded an average \$1,803 per reported occurrence. Theft from motor vehicles averaged \$857 per report, while the average purse-snatching resulted in a \$434 loss and the average loss to victims of pocket-picking was \$394. The lowest average value lost to theft was shoplifting with an average of \$168.

## Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 19 per-

cent of all reported thefts. As with other non-violent property crimes, theft is primarily a crime of opportunity. The factors of opportunity and stealth work in the favor of perpetrators and against police detection, thereby reducing available solutions for this offense.

## Persons Arrested

Texas law enforcement agencies made 109,564 larceny-theft arrests in 2011. When compared with 2010, the number of persons arrested for theft decreased 6 percent. Of the theft arrestees, 14 percent were juveniles (16 and under); 57 percent were male; 73 percent were White; 26 percent were Black and the remainder were other races; 65 percent were not Hispanic and 35 percent were Hispanic. The age group with the largest number of theft arrestees was the 15-to-19 year-old group.

Value of Property Stolen in Theft			
Type of Theft	Estimated Offenses	Property Value	Average Loss
Pocket-Picking	2,453	\$966,835	\$394
Purse-Snatching	1,982	\$861,218	\$434
Shoplifting	105,521	\$17,718,347	\$168
Theft from Motor Vehicles	162,334	\$139,162,446	\$857
Motor Vehicle Parts	58,731	\$47,098,664	\$801
Bicycles	12,222	\$3,963,087	\$324
Theft from Buildings	33,437	\$41,237,730	\$1,233
Theft from Coin-Operated Machines	2,236	\$661,177	\$296
All Other	217,151	\$391,688,670	\$1,803
<b>TOTAL</b>	<b>596,067</b>	<b>\$643,358,174</b>	<b>\$701</b>

# MOTOR VEHICLE THEFT

## DEFINITION

Motor Vehicle Theft, for UCR purposes, is the theft or attempted theft of a motor vehicle. A motor vehicle is defined as a self-propelled vehicle that travels on the surface but not on rails. Specifically excluded from this category are motor boats, construction equipment, airplanes, and farming equipment.

## ANALYSIS

### Volume

The estimated number of motor vehicle thefts committed in Texas in 2011 was 63,379. The volume of motor vehicle theft decreased 7.1 percent when compared with 2010. More motor vehicle thefts were committed in May than in any other month, while the fewest motor vehicle thefts were committed during February.

### Rate

The 2011 motor vehicle theft rate for Texas was 246.9 motor vehicle thefts for every 100,000 persons. The change in the motor vehicle theft rate from 2010 was a decrease of 9 percent.

### Nature

In 2011, motor vehicle theft victims suffered losses totaling \$621,616,794. This total value loss represents a decrease of 2.2 percent when compared to 2010 total motor vehicle theft losses. The average dollar loss per motor vehicle theft was \$10,209, up from \$9,403 in 2010. Of the types of motor vehicles that are reported to be stolen, 56 percent are automobiles, 32 percent are trucks and buses, and the remainder are classed as 'other vehicles.' The 'other vehicles' classification includes all other motor vehicles, such as snowmobiles, motorcycles, motor scooters, trail bikes, mopeds, golf carts and the like.

### Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 12 percent of all motor vehicle thefts that were reported. Persons under 18 years of age accounted for 10 percent of the motor vehicle thefts that were cleared.

Of the three vehicle types for which information is collected, automobiles show the highest rate of clearance at 14 percent. Thefts of trucks and buses were cleared at a 9 percent rate, and the 'other vehicle' classification shows a 10 percent clearance rate.

### Recoveries

In 2011, 56 percent of the motor vehicles reported stolen were recovered. Out of the recovered vehicles, 78 percent were stolen locally and recovered locally. The remaining 22 percent were stolen locally and recovered by another jurisdiction.

### Persons Arrested

In 2011, Texas law enforcement agencies arrested 3,979 persons for motor vehicle theft. When compared with 2010, the number of motor vehicle theft arrests decreased 15.7 percent. Of the motor vehicle theft arrestees in 2011, 13.3 percent were juveniles (16 and under); 83 percent were male; 77 percent were White and 23 percent were Black; 66 percent were not Hispanic and 34 percent were Hispanic. The age group with the largest number of motor vehicle theft arrests was the 15-to-19 year-old group.

# ARSON

## DEFINITION

For Uniform Crime Reporting purposes, arson is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, a house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded from data collection.

## ANALYSIS

### Volume

The reported number of arsons committed in Texas in 2011 was 4,822. The volume of arson offenses decreased 12.6 percent in comparison with 2010. Because the U.S. Congress did not mandate arson to be an Index Crime until 1979, information on offenses before that year is incomplete.

### Rate

The 2011 arson rate for Texas was 18.8 arsons for every 100,000 persons. The change in the arson rate from 2010 was a decrease of 14 percent.

### Nature

Structures comprised some 50 percent of the reported incidents and 79 percent of the property value lost to arson. Mobile property constituted 29 percent of the reported arsons, but only 17 percent of the value lost. The 'other' category (crops, timber, fences, signs, etc.) formed the remaining 21 percent of the arsons and 4 percent of the value lost.

Residential property was involved in 69 percent of the structural arsons in 2011, with 76 percent of such arsons directed at single occupancy dwellings. Of all targeted structural property, 25

percent of the properties were uninhabited at the time the arson occurred. Motor vehicles composed 95 percent of all mobile property at which arsons were directed.

In 2011, arson victims suffered losses totaling \$85,076,510. This total value loss represents a 51 percent decrease when compared with 2010 total arson losses. The average dollar loss per arson was \$17,643 - down from \$30,307 in 2010. All Other Structure was the classification with the highest average loss per offense, \$41,028. Community/public structures showed an average loss of \$18,141, motor vehicle arsons averaged a loss of \$9,097 and the "other" group (crops, timber, fences, signs, etc.) had the lowest average loss of \$3,390.

### Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 18 percent of all arsons that were reported. Of the various property classifications, Community/Public had the highest clearance rates (37 percent). Mobile-Automobiles showed the lowest clearance rate (9 percent) of any property class.

Of all arson clearances, 36 percent involved persons under the age of eighteen. Persons in this age group accounted for 70 percent of the Community/Public structure arson clearances, 23 percent of all other structure category clearances and 40 percent of the "other" arson clearances.

### Persons Arrested

Texas law enforcement agencies arrested 620 persons for the crime of arson in 2011. When compared with the previous year, the number of persons arrested for arson increased 7.2 percent. Of the persons arrested for arson in 2011, 29 percent were juveniles (16 and under); 82 percent were male; 78 percent were White; 21 percent were Black; the remaining 1% were Asian/Pacific Islander. 69 percent were not Hispanic and 31 percent were Hispanic. The age group that contained the highest number of arson arrestees was the 15-to-19 year old group.
