# FAMILY VIOLENCE 1999

# DEFINITION

The Texas Family Code defines Family Violence as an act by a member of a family or household against another member that is intended to result in physical harm, bodily injury, assault, or a threat that reasonably places the member in fear of imminent physical harm. The law excludes the reasonable discipline of a child and defines abuse as physical injury that results in substantial harm or genuine threat; sexual contact, intercourse, or conduct; or compelling or encouraging the child to engage in sexual conduct.

By definition and for the purposes of family violence reports, 'Family' includes individuals related by consanguinity (blood) or affinity, marriage or former marriage, biological parents of the same child, foster children, foster parents, and members or former members of the same household (including roommates).

#### **Officer Assaults**

A serious problem inherent to police intervention and investigation of family violence is the potential for law officers to be assaulted. In 1999, during the course of responding to family violence incidents, 564 Texas law officers were assaulted. By contrast, Uniform Crime Reports for 1999 listed 5,019 assaults on law officers during all types of police activity.

#### Offenses

Offense information in the family violence program is collected according to federal UCR guidelines and do not necessarily conform to Texas state definitions. Complete offense definitions are available in the appendix to this publication. Family violence offense information falls into six general categories: assaults, homicides, kidnapping/abductions, robberies, forcible sex offenses, and nonforcible sex offenses. Of the six main categories, assaults accounted for 98% of all offenses. Information for each individual crime is represented in the chart on the next page.

Of the apparent major injuries, severe lacerations were the most common at 32 percent. Possible internal injuries were reported in 29 percent of the apparent major injury reports, and apparent broken bones were noted in 13 percent of the apparent major injury cases.

#### Injuries

For the purposes of this family violence report, the police officers who responded to disturbance calls determined the extent of injuries and all injuries were considered to be apparent injuries. If later medical attention indicated that the injuries were more or less severe than noted by the responding officer, this information is not included in the family violence report. The majority of reported injuries (51%) were considered to be minor injuries. In another 45 percent of family violence reports, 'no injury' was recorded. Major injuries were reported in 4 percent of the cases.

#### Weapons

The most common weapon involved in family violence cases was physical force through the use of hands, feet, and fists (strong-arm), which accounts for 76 percent of the incidents. The Texas Family Violence law considers the use of threats and intimidation to be serious enough to report and, thus, 10 percent of the reports were listed as involving no weapons. Knives or cutting instruments (4 percent), blunt objects (3 percent), firearms (2 percent) and other (5 percent) account for the remaining cases. Considered as other weapons were motor vehicles, poison, explosives, fire, drugs, unknown, and miscellaneous weapons.
