</table>
Strong northeasterly winds will continue to produce elevated seas and rough conditions along the lower Texas coast. This will increase the likelihood of dangerous rip currents and surf, as well as increase water levels along the beach. Minor coastal flooding will continue along area beaches with the peak being around high tide cycles.
Strong northeasterly winds will continue to produce elevated seas and rough conditions along the lower Texas coast. This will increase the likelihood of dangerous rip currents and surf, as well as increase water levels along the beach. Minor coastal flooding will continue along area beaches with the peak being around high tide cycles. A High Surf Advisory is in effect for Coastal Willacy, Coastal Cameron, and Coastal Kenedy Counties through Saturday Evening.
