</tbody>
</table>
There is a marginal to slight risk of severe thunderstorms late this afternoon and into this evening from southeastern New Mexico into the Permian Basin. Large hail and strong winds will be the main threat though an isolated tornado cannot be ruled out.

Thunderstorms may develop along a cold front that will stall south of Lubbock then move to the northeast. Some of the storms may become severe. High temperatures will be in the 70s to near 80.
A few thunderstorms could produce large hail and damaging winds.

Strong to severe thunderstorms will be possible late this afternoon and tonight, across the area along and north of Throckmorton to Sterling City line. The main severe weather hazards are large hail and damaging winds, along with deadly lightning. Stay tuned to the latest weather updates later today and tonight.
