Severe Weather Outlook
Tuesday, May 14, 2019

Last Updated: May 13 2019 1240 AM CDT
Valid Until: May 13 2019 0700 AM CDT
Unseasonably warm conditions are expected across the Texas and Oklahoma Panhandles today. Isolated thunderstorms will be possible across the western Oklahoma Panhandle and the northwestern Texas Panhandle by mid to late afternoon through this evening. The stronger storms will be capable of producing small hail and gusty winds. Highs today will range from the lower and middle 80s.

Seasonable temperatures today, with a chance of showers and storms well southwest of Houston near Matagorda Bay. Rain potential will decrease towards the northeast.
Hazardous Weather

Mostly cloudy with isolated to scattered showers and thunderstorms. Highs will be in the low to mid 80s. Winds will be generally northeast to east at 10 to 15 mph.

Scattered showers and thunderstorms will continue to be expected through the morning and into the afternoon. Temperatures will be mild otherwise with slightly below average temperatures under mostly cloudy skies. For the mariners, expect a moderate chop across the bay and gulf seas of 2 to 5 feet.
Today will feature highs ranging from the upper 70s to mid 80s under partly sunny skies. Isolated showers and thunderstorms will be possible this afternoon and evening across much of the region, with perhaps even some scattered showers and thunderstorms across the Hill Country and the Coastal Plains. Some of these storms will be capable of producing some heavy downpours, as well as some hail and gusty winds.

Isolated to scattered showers and thunderstorms Tuesday. Rainfall amounts will be lighter, generally less than 1/10 inch. The main hazard is dangerous lightning.
