Weather Forecast

Highs

Lows
Windy with blowing dust across southern New Mexico and west Texas today. Critical fire weather conditions will exist.

A Slight Risk for severe thunderstorms exists today across portions of southeast New Mexico, the Permian Basin, and Trans Pecos region. Large hail, and damaging winds will be the main threats along with frequent lightning and localized flash flooding. Make sure you have multiple ways to receive warnings!
Hazardous Weather

Severe weather is expected again on Sunday. High winds, very big hail and tornadoes will all be possible....flooding, too. Have multiple ways to receive weather alerts. Be weather ready.

Flooding will be a concern after all the rain some places have received so far. More Severe thunderstorms are possible after 2 pm today though the night.
Isolated severe thunderstorms could develop as early as noon Sunday. The main area of concern for early afternoon will be the far west combined Panhandles and the southern Texas Panhandle. Large hail and damaging wind gusts are the main concern.

Going into Sunday evening more wide spread storms are expected. Higher potential for severe storms will be in the west and northern combined Panhandles. Hazards include large hail, damaging winds, tornadoes, and flooding. The flood potential will be the highest in the eastern Panhandles.
Hazardous Weather

There will be another risk of severe storms, mainly over western Oklahoma, on Sunday.
