A Red Flag Warning is in effect for the Guadalupe Mountains through this evening.

Thunderstorms will be possible tonight, with the higher chances across western parts of the area. There will be potential for strong to severe storms.
There will be a risk for showers and thunderstorms today and tomorrow across parts of the area. The risk of rain/storms today (Tuesday) is very conditional and there's a chance that most areas remain rain/storm free through much of the day. Locations west of I-35 and north of I-20 have the best chance for rain/storms. A few storms could be strong to severe with hail, strong winds and heavy rain. The risk for more widespread storms arrives through the day on Wednesday. A higher threat for strong to severe storms along with heavy rain and flooding will exist, mainly across North Texas.
