Disclaimer: The purpose of this briefing is to provide a Regional weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.
Summary of the Upcoming Week

Today
- Isolated strong to severe storms with damaging winds/large hail being the main threats across W OK and NW TX.

Friday - Saturday
- Isolated strong to severe storms with damaging winds/large hail being the main threats across W TX and W OK on Friday.
- Critical fire weather conditions across W NM on Friday.
- Slight risk for severe storms with damaging winds/large hail being the main threats across W OK/NW TX on Saturday.
- Isolated heavy rainfall/flash flooding possible across TX Panhandle into OK on Saturday.

Sunday - Monday
- Isolated heavy rainfall/flash flooding possible across OK, N TX, and AR on Sunday.

Major River Flooding or Known Evacuations
- The Mississippi River continues to slowly crest and will slowly recede through the week.

Tropical Weather Outlook
- Tropical cyclone formation is not expected during the next 5 days.
# FEMA Region 6 Threat Matrix

Tropical cyclone formation is not expected during the next 5 days.
The Mississippi River will continue to slowly crest and recede.

- Osceola: Has crested in moderate flood stage (32.3 ft) and will slowly recede with mostly agricultural flooding and some roads impacted.
- Near Arkansas City, the river crested at 43.18 ft and is slowly receding; many roads still cut off.
- At Red River Landing the river crested at 61.27 ft with mostly agricultural/recreational impacts.
- Baton Rouge has crested but remains in major flood above (43 ft) with shipping and industrial impacts. Moderate flood stage is 38 feet or lower.

<tbody>
<tr>
<td>Green</td>
<td><strong>Very Common</strong> Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines</td>
<td>Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active</td>
<td>• Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees • Something that happens almost every day in a particular season such as seacore storms in coastal TX</td>
</tr>
<tr>
<td>Yellow</td>
<td><strong>Somewhat Common – Happens Frequently</strong> Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life</td>
<td>Severe: Slight Risk from SPC Flooding: Nuisance flooding expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook</td>
<td>• 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible • Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and “hail”</td>
</tr>
<tr>
<td>Orange</td>
<td><strong>Uncommon – A Few Times a Year</strong> Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life</td>
<td>Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions</td>
<td>• A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely • Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail • Some large fires reported, burn bans advertised, critical conditions expected</td>
</tr>
<tr>
<td>Red</td>
<td><strong>Rare – Once every 1-5 Years</strong> Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life</td>
<td>Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought</td>
<td>• A Category 1 hurricane will be moving towards the NW Gulf in the next few days • Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail • Large fires ongoing throughout the area with critical fire weather conditions expected to continue</td>
</tr>
<tr>
<td>Purple</td>
<td><strong>Very Rare – Once Every 5-10 Years</strong> Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life</td>
<td>Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (cats or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long-term (months) of severe to extreme drought</td>
<td>• A Category 4 hurricane is headed towards the SE LA, major storm surge, flooding and damaging winds anticipated to begin tomorrow • Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms</td>
</tr>
