</table>
If you liked Friday’s weather, we will see that kind of weather again on Saturday. Our high temperatures on Saturday will be near seasonal averages under partly cloudy skies. We will see isolated lowland and scattered mountain thunderstorms.

Hot with isolated showers and thunderstorms. The main hazards are strong gusty winds and dangerous lightning.
Additional thunderstorms are expected today, with the greatest chances near and east of I-35. While severe weather is generally not expected, some storms will be capable of producing gusty winds, heavy rainfall, and localized flooding.

It will be another hot day across South Central Texas with high temperatures from the middle 90s to 103. There is a slight chance for thunderstorms during the afternoon across the eastern half of the area and across most of the area during the evening.
Isolated showers and thunderstorms are possible today across the Coastal Plains and Victoria Crossroads with high temperatures in the 90s.
