The Texas Department of Public Safety (DPS) released the first *Traffic Stop Data Report* in October of 2000, providing information relating to law enforcement traffic stops. The Code of Criminal Procedure mandates Texas law enforcement agencies collect certain traffic stop data and disseminate this data to the governing body of the agency.

The *Traffic Stop Data Report* is issued annually in an ongoing effort to inform the state's leadership, DPS commissioned officers, and interested citizens of the State of Texas about DPS traffic enforcement activities. In doing this, the intent of DPS is to ensure transparency. The annual report details traffic stop activities of the Texas DPS for the previous calendar year.

This year, in addition to the DPS statewide summary data previously provided, the same information is presented for each DPS Region. Furthermore, a limited comparison of DPS data with that of the largest police department within each region is included.

This report includes the Racial/Ethnic demographic composition of the Texas population based on the official *2014 Population Estimate* reported by the United States Census Bureau in June of 2015.

The Texas Department of Public Safety is committed to the prevention of racial profiling. The DPS has zero-tolerance regarding racial profiling, and troopers are held to the highest standard of conduct. DPS Troopers are required to video and audio record each traffic stop for evidentiary purposes. All allegations of racial profiling are immediately and thoroughly investigated, and anyone who believes they have been a victim of racial profiling or otherwise treated unfairly should immediately report it to the DPS Office of Inspector General. Racial profiling is illegal, inconsistent with the principles of American policing, and an indefensible public protection strategy denounced by the DPS.
