

# NIBRS SPECIFICATIONS UPDATE

The FBI released version 2025 of the NIBRS specifications in June. TXDPS is working to implement these updates in our system and will notify agencies once we are able to ingest v2025.

## WHAT DOES THAT MEAN FOR OLDER SPECIFICATIONS?

- ▶ Along with the current specifications (i.e., v2025), the FBI accepts the previous 2 versions of specifications (i.e., v2019.2 and v2023).
- ▶ That means v2019.2 will continue to be accepted through the release of the 2027 specifications; estimated for June of 2027.

## WHAT DO AGENCIES NEED TO DO?

- ▶ Ahead of the 2027 deadline, agencies should work with their RMS vendor to update to newer specifications (both NIBRS and TX-mandates).
  1. NIBRS v2019.2 will be sunset around June of 2027.
  2. TX-Mandated Reporting v2020 will be sunset at that same time.
