FEMA Proficiency report developed to track the required Monthly Proficiency Test. However, other valuable info is listed. The report provides information such as COG IDs (Production / Test), COG Name, Certificate and MOA expiration dates, POC, as well as system Online status. The report was used to build the TDEM IPAWS Board.

## **Basic IPAWS System Management and Documentation**

### Determine need to be an Alerting Authority

Confirm there is not a conflict between your jurisdiction and another jurisdiction that may be an Alerting Authority. Coordinate with the State / TDEM to ensure no conflicts

Develop your Alerting Plan. Determine a product. Complete required online IPAWS course.

### Authorization Documents

Submit MOA documentation to FEMA IPAWS. Submit copies of MOA and IPAWS training certificates to the state (TDEM).

TDEM submits signed PAA to FEMA IPAWS

### Test / Training

Once system is online, conduct Monthly Proficiency Test with the FEMA IPAWS Lab. This is a requirement. Missing three consecutive tests could lead to suspension of Alerting Authorization by FEMA. Regular training and testing is encouraged.

## Basic IPAWS System Management and Documentation

### Renewals:

The MAO and Security Certificates must be renewed every three (3) years. There is usually a separation between the dates, so they don't expire at the same time.

### WebEOC IPAWS Board

The purpose of the TDEM WebEOC IPAWS board is to help users track the status of their systems, POC info and provide an online location of their pertinent IPAWS documents
