

Texas Private Security License (Pocket Card) New Design January 2025

The information below is to introduce the new Texas Private Security License (Pocket Card) and highlight new security features.

PRIVATE SECURITY LICENSE (front)

Polycarbonate Card

Card is more durable, secure, and tamper resistant.

Laser Engraving

All person data, including black & white photo, is laser engraved in the card. Please note that the address on the front of the card is not the cardholder's but instead is that of the DPS for the safety of the cardholder.

License Type

The license type provides all specific license (s) held by the cardholder.

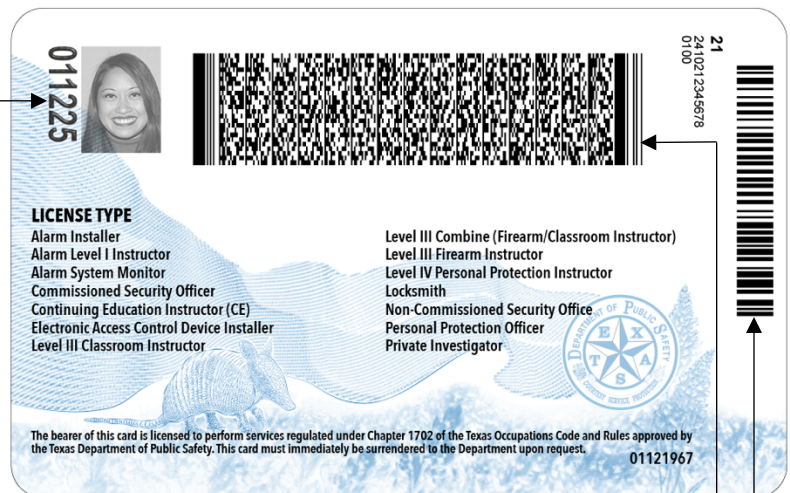

Laser Engraving

All person data, including black & white photo, is laser engraved in the card.

Tactile Text

Expiration Date is laser engraved in the card to provide a raised effect that you can feel as you rub your finger across the surface of the card.

PRIVATE SECURITY LICENSE (back)

1D Barcode

1D barcodes provide both a means for verifying cardholder identity and for protecting against counterfeiting and alteration. The 1D barcode contains a unique identification number.

2D Barcode (PDF417)

2D barcodes can contain cardholder data in a standardized, machine-readable format.
