

Only the beginning...

The resources outlined here represent only the beginning. As the LEEP continues to expand, even more services and applications will be available with just a single sign-on.

For more information on the LEEP or to find out how to become a Service Provider (an agency that provides a service/resource to the LEEP) or Identity Provider, please contact the Support Center, which is available 24/7 to answer any questions.

Federal Bureau of Investigation
Criminal Justice Information Services Division

Law Enforcement Enterprise Portal

What is the Law Enforcement Enterprise Portal?

The FBI's Law Enforcement Enterprise Portal (LEEP) is a gateway providing law enforcement agencies, intelligence groups, and criminal justice entities access to beneficial resources. These resources will strengthen case development for investigators, enhance information sharing between agencies, and be accessible in one centralized location!

The resources available include:

- Virtual Command Centers
- Nationwide criminal justice records
- Global cyber-complaint data
- Counterterrorism threat tracking
- Intelligence centers
- Plus many more...

Along with these great resources being in one centralized location, you are also able to gain access by logging in using a single sign-on process. In other words, by using one username and one password, you can obtain access to many different resources and services within the LEEP.

Who Can Access the LEEP?

Any user from a local, state, tribal, and federal law enforcement agency that is an Identity Provider (IdP) can access the LEEP. An IdP is an agency that partners with the LEEP, which gives their users easier access to the LEEP resources.

or

Anyone who has a LeapID account (formerly known as your LEO account) can access the LEEP. To obtain a LeapID account, go to www.cjis.gov.

How Do I Access the LEEP?

If your agency is a participating IdP, simply log onto your agency workstation.

or

If your agency is not an IdP, go to www.cjis.gov and use your LeapID username and password.

How LEEP Works:
