

- The new cards have increased security features, including being made of a polycarbonate material that is tamper resistant and difficult to reproduce, and meet the national standards set by the American Association of Motor Vehicle Administrators (AAMVA).
- As with the current design, the new cards will continue to feature a gold star in the upper right corner to indicate the card is REAL ID compliant.
- If a health condition exists that impedes the ability to communicate with a peace officer, a Communication Impediment Identifier may appear on the front of the DL/ID.
- The heart shape of the organ donor identifier remains the same.
- This new design provides all information necessary for identification and verification purposes in an easy-to-read format.
